# Introduction

The Emotional Quotient™ report looks at a person's emotional intelligence, which is the ability to sense, understand and effectively apply the power and acumen of emotions to facilitate higher levels of collaboration and productivity. The report was designed to provide insight into two broad areas: Intrapersonal and Interpersonal emotional intelligence.

Research shows that successful leaders and superior performers have well developed emotional intelligence skills. This makes it possible for them to work well with a wide variety of people and to respond effectively to the rapidly changing conditions in the business world. In fact, a person's (EQ) emotional intelligence may be a better predictor of success performance than intelligence (IQ).

This report measures five dimensions of emotional intelligence:

## Intrapersonal emotional intelligence

What goes on inside of you as you experience day-to-day events.

**Self-Awareness** is the ability to recognize and understand your moods, emotions and drives, as well as their effect on others.

**Self Regulation** is your ability to control or redirect disruptive impulses and moods and the propensity to suspend judgment to think before acting.

**Motivation** is a passion to work for reasons that go beyond money or status and a propensity to pursue goals with energy and persistence.

## Interpersonal emotional intelligence

What goes on between you and others.

**Empathy** is your ability to understand the emotional makeup of other people.

**Social Skills** is a proficiency in managing relationships and building networks.

Is the report 100% true? Yes, no and maybe. We are only measuring emotional intelligence. We only report statements from areas in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

# Emotional Quotient Assessment Results

The Emotional Quotient (EQ) is a measure of your ability to sense, understand, and effectively apply the power and acumen of your emotions and the emotions of others in order to facilitate high levels of collaboration and productivity. Your overall score on the Emotional Quotient Assessment indicates your level of overall emotional intelligence. The higher the number, the more emotionally intelligent you are. If your goal is to raise your EQ, the components on which you have scored the lowest should be the focus of your development.

**1. SELF-AWARENESS** - The ability to recognize and understand your moods, emotions and drives, as well as their effect on others.

**2. SELF-REGULATION** - The ability to control or redirect disruptive impulses and moods and the propensity to suspend judgment and think before acting.

**3. MOTIVATION** - A passion to work for reasons that go beyond money or status, and a propensity to pursue goals with energy and persistence.

**4. EMPATHY** - The ability to understand the emotional makeup of other people.

**5. SOCIAL SKILLS** - A proficiency in managing relationships and building networks.
